

SPECIAL **TOOL** SERIES

Natural diamond

Lythetic Monocrystal Diamond

**TOOLS ARE
CUSTOMIZABLE**

Efficiency Pursue Ultimate Limit, Always Maintain High Quality to prove ourselves.

Precision bases on improvement challenge accepted through practices

Natural Diamond

Natural diamond tools are widely used in precision manufacturing industry of non-ferrous metal. Specific welding method is used to braze the natural diamond on the shank together with special geometrical angle design and tip shaping technology.

Clamping pressure can be divided into sealed type and brazing type. Sealed type is mainly used for mirror finish; Brazing type cutting tool currently adopts the most advanced high-strength brazing technology, and welding strength can reach 300-400mpa with high precision and cutting fluency. Now it is widely used in turning, milling of mirror finish, and wheel dressing.
